

Precoat Metals

Precoat Metals

Heating It Up; Cooling It Down

Located near a major metal source, the Armorel, Arkansas facility is well positioned to service the HVAC, lighting fixture and automotive

manufacturing facilities that are located in the South.

The plant can coat metal up to 64 inches wide with metal thickness ranging from 0.012 up to .070 inches thick. Additionally, this high-speed coating line can level your metal as well as slit. With truck, rail and barge access, the Armorel coating facility is an excellent location for servicing your coating needs.

We continue to focus on excellent customer service so you can meet your tight deadlines and enjoy the highest quality in coatings.
